Riddhi Rathod

PROFESSIONAL SUMMARY

Python backend and ERP developer with 1.5+ years of hands-on software development experience delivering Odoo 17/18 and backend solutions across 3 client domains. Built 2 company-wide internal tools using Flask, Django, and FastAPI, and owned PostgreSQL procedures plus 3 third-party API integrations. Experienced in REST integrations, workflow automation, database design, and feature delivery from requirements through deployment.

TECHNICAL SKILLS

Programming: Python, SQL, Java, JavaScript
Backend Frameworks: Django, Flask, FastAPI
Odoo & ERP: Odoo 17, Odoo 18, Odoo Enterprise, Owl Framework, Custom Module Development
Databases & Tools: PostgreSQL, MySQL, MongoDB, GitHub, GitLab, Postman
DevOps & Infrastructure: Apache, Docker, SSL/Certbot
Data Science & AI: Pandas, NumPy, Scikit-learn, TensorFlow, OpenAI, GitHub Copilot, LangChain
LMS & E-Learning: Open edX, LMS Development, XBlock Development
Languages: English, Hindi, Gujarati

PROFESSIONAL EXPERIENCE

CodeTrade India Pvt. Ltd. **Apr 2026 - Present**
Software Developer Ahmedabad, Gujarat

- Delivered Odoo 17/18 modules across 3 client domains: hospital management, logistics, and e-commerce.
- Launched 2 internal tools now used company-wide: a Flask-based Apache/SSL deployment platform and a Django + FastAPI services platform.
- Owned backend logic, PostgreSQL procedures, and 3 third-party API integrations across production projects.

CodeTrade India Pvt. Ltd. **Sep 2025 - Mar 2026**
Software Developer (Odoo Trainee) Ahmedabad, Gujarat

- Created custom Odoo modules and implemented business workflows during a 6-month software development traineeship.

Wan Buffer Services **Nov 2024 - May 2025**
Odoo Intern Ahmedabad, Gujarat

- Customized 5 core Odoo modules - Sales, Purchase, Manufacturing, CRM, and Recruitment - with business logic and workflow enhancements.
- Supported AI integration within Odoo and automated HR processes using Python.

SELECTED PROJECTS

Hospital Management System
Odoo 17 Enterprise | Python | PostgreSQL | Owl Framework

- Engineered a bulk-import utility that onboarded 1,000+ paper-based patient records in a single run, with validation for malformed entries.
- Moved bulk operations into optimized PostgreSQL stored procedures to process 1,000+ records at the database layer; customized Owl interfaces across 3 workflows.

Logistics Integration & Delivery Tracking

Odoo 17 Enterprise | Python | REST APIs (ShipBob, WooCommerce, FedEx)

- Centralized order, fulfillment, and delivery data from 3 platforms - WooCommerce, ShipBob, and FedEx - into one Odoo dashboard.
- Automated WooCommerce-ShipBob order and fulfillment sync to remove manual data entry and integrated FedEx tracking for real-time delivery status.

E-Commerce Marketplace Website

Odoo 18 Enterprise | Python | XML | JavaScript | PostgreSQL

- Built 2 custom storefront features - a checkout flow and an events showcase - aligned with the marketplace listing structure.
- Implemented seller-wise access and configured seller branding across 2 output types: invoice reports and transactional email templates.

Internal Site Management Platform

Flask | Python | Apache | SSL/Certbot | Docker

- Automated Apache domain deployment with apachectl configtest validation, replacing hand-edited configuration files.
- Added per-domain SSL through Certbot and 2 role-based dashboards controlling .conf editing and folder access.

Construction Services Platform

Django | FastAPI | Python | PostgreSQL

- Designed 2 distinct user flows for clients and professionals, plus an admin teams section for employee and project-assignment management.

Smart Resume Parser for HR

Odoo 17 Enterprise Recruitment | Python | OpenAI

- Integrated the OpenAI API to extract 4 structured candidate fields - experience, education, skills, and role fit - from multilingual DOCX/PDF resumes.
- Applied prompt engineering to generate per-candidate analysis, reducing manual screening effort for HR.

WalletGenie

Python | Django

- Coded the Django backend for a personal finance application with transaction history and balance tracking for reward-linked spending.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

L.J Institute of Engineering and Technology

Nov 2022 - May 2026

CGPA: 9.27
